**Royal Sense Limited is excited to announce the official launch of our latest products in
Pharmaceutical Category**

Here are some details you might find in the launched products:

1) Prigal 75 mg

Details: Prigal 75 mg is an anticonvulsant used to treat neuropathic pain, seizures, and anxiety disorders. It may cause dizziness.

Description: Prigal 75 mg is an anticonvulsant medication primarily used to treat neuropathic pain resulting from conditions like diabetic neuropathy or spinal cord injury. It's also effective in managing fibromyalgia and generalized anxiety disorder. Pregabalin works by inhibiting certain neurotransmitters in the brain, which helps reduce pain signals and has calming effects on nerve activity. Common side effects include dizziness, drowsiness, dry mouth, and weight gain. It's essential for patients to follow healthcare providers' instructions regarding dosage, as abrupt discontinuation can lead to withdrawal symptoms. Pregabalin is often prescribed as part of a comprehensive treatment plan, which may include other medications and therapeutic approaches, to enhance overall management of pain and anxiety. Regular monitoring by a healthcare professional is recommended.

2) Prigal 150 mg

Details: Prigal 150 mg is an anticonvulsant used to treat neuropathic pain, seizures, and anxiety disorders. It may cause dizziness.

Description: Prigal 150 mg is an anticonvulsant medication primarily used to treat neuropathic pain resulting from conditions like diabetic neuropathy or spinal cord injury. It's also effective in managing fibromyalgia and generalized anxiety disorder. Pregabalin works by inhibiting certain neurotransmitters in the brain, which helps reduce pain signals and has calming effects on nerve activity. Common side effects include dizziness, drowsiness, dry mouth, and weight gain. It's essential for patients to follow healthcare providers' instructions regarding dosage, as abrupt discontinuation can lead to withdrawal symptoms. Pregabalin is often prescribed as part of a comprehensive treatment plan, which may include other medications and therapeutic approaches, to enhance overall management of pain and anxiety. Regular monitoring by a healthcare professional is recommended.

3) Prigal 300 mg

Details: Prigal300 mg is an anticonvulsant used to treat neuropathic pain, seizures, and anxiety disorders. It may cause dizziness.

Description

Prigal 300 mg is an anticonvulsant medication primarily used to treat neuropathic pain resulting from conditions like diabetic neuropathy or spinal cord injury. It's also effective in managing fibromyalgia and generalized anxiety disorder. Pregabalin works by inhibiting certain neurotransmitters in the brain, which helps reduce pain signals and has calming effects on nerve activity. Common side effects include dizziness, drowsiness, dry mouth, and weight gain. It's essential for patients to follow healthcare providers' instructions regarding dosage, as abrupt discontinuation can lead to withdrawal symptoms. Pregabalin is often prescribed as part of a comprehensive treatment plan, which may include other medications and therapeutic approaches, to enhance overall management of pain and anxiety. Regular monitoring by a healthcare professional is recommended.

4) Prigal M

Details : Prigal M is Methylcobalamin 750 mcg and Pregabalin 75 mg are used together for nerve pain relief and promoting nerve health and function.

Description: Prigal M is Methylcobalamin and Pregabalin are two medications often combined to treat neuropathic pain and related conditions. Methylcobalamin, a vitamin B12 analog, plays a crucial role in nerve function and red blood cell formation, addressing deficiencies and conditions like megaloblastic anemia and neuropathy.

Pregabalin, an anticonvulsant and analgesic, effectively manages epilepsy, neuropathic pain, fibromyalgia and anxiety disorders by regulating neurotransmitter release. When combined, Methylcobalamin enhances Pregabalin's pain-relieving effects, improving nerve function and pain management. This combination is commonly indicated for diabetic neuropathy and peripheral neuropathy.

The recommended dosage is typically Methylcobalamin (750mcg) + Pregabalin (75mg), but it's essential to consult a doctor for personalized medical advice, as dosage and indications may vary based on individual health conditions and medical history.

5) Stergic Blood Lancets Round

Details: Stergic Blood lancets Round is single-use needles for capillary blood sampling, various gauge sizes (21-30G), precise, minimally painful, diagnostic testing.

Description: Stergic Blood lancets Round are single-use needles designed for capillary blood sampling, a crucial diagnostic procedure. They come in various gauge sizes, ranging from 21 to 30 gauge, with smaller gauges causing less discomfort. These precision instruments enable healthcare professionals to collect tiny blood samples from the fingertip or heel.

6) Stergic Blood Lancets Flat

Details: Stergic Blood lancets Flat is single-use needles for capillary blood sampling, various gauge sizes (21-30G), precise, minimally painful, diagnostic testing.

Description: Stergic Blood lancets Flat are single-use needles designed for capillary blood sampling, a crucial diagnostic procedure. They come in various gauge sizes, ranging from 21 to 30 gauge, with smaller gauges causing less discomfort. These precision instruments enable healthcare professionals to collect tiny blood samples from the fingertip or heel.

7) EF.TUM

Details: EF.TUM 500 (cefuroxime 500) a Second-generation cephalosporin antibiotic, treats bacterial infections (respiratory, urinary, skin, ear, throat), 500mg tablets/capsules, twice daily.

Description: EF.TUM 500(Cefuroxime 500), is a broad-spectrum antibiotic belonging to the second-generation cephalosporin class. It is used to treat various bacterial infections, including respiratory tract infections, urinary tract infections, skin and soft tissue infections, and gonorrhea.

Key Features:

- Strength: 500 mg
- Dosage: Typically 250-500 mg twice daily for 7-10 days
- Mechanism: Inhibits bacterial cell wall synthesis
- Spectrum: Effective against Gram-positive and Gram-negative bacteria
- Absorption: Well-absorbed orally, with peak plasma levels within 2 hours
- Side effects: Nausea, vomiting, diarrhea, and allergic reactions (rare)

Precautions:

- Contraindicated in patients with cephalosporin or penicillin allergies
- Use with caution in patients with renal impairment or pregnancy
- Monitor for signs of pseudomembranous colitis

8) JCZ-C

Details: JCZ-C (Cetirizine 10mg) is Antihistamine for allergy relief, treating hay fever, hives, and itching. Dosage: 1 tablet once daily, max 10-14 days.

Description:

JCZ-C (Cetirizine 10mg) is an Effective Antihistamine

Cetirizine 10mg is a non-sedative antihistamine used to relieve allergy symptoms.

Key Features:

- Strength: 10 mg
- Dosage: 1 tablet once daily, max 10-14 days
- Mechanism: Blocks histamine receptors
- Indications: Allergic rhinitis, urticaria, pruritus, and insect bites

Benefits:

- Rapid onset of action (1 hour)
- Long-lasting relief (24 hours)
- Non-drowsy formulation

Precautions:

- Contraindicated in severe renal impairment and lactation
- Use with caution in pregnancy, hepatic impairment, and elderly patients
- Common side effects: drowsiness, dry mouth, fatigue

Interactions:

- Avoid concurrent use with other antihistamines or sedatives
- Consult a healthcare professional before taking Cetirizine, especially if taking other

9) JCZ 5

Details: JCZ 5 is an Non-sedative antihistamine for allergy relief, treating hay fever, hives, and itching. Once-daily dosage.

Description: Levocetirizine 5mg, commonly known by its brand name Xyzal, is a non-sedative antihistamine used to relieve allergy symptoms.

Key Features:

- Strength: 5 mg
- Dosage: 1 tablet once daily
- Mechanism: Blocks histamine receptors
- Indications: Allergic rhinitis, urticaria, pruritus, and insect bites

Benefits:

- Rapid onset of action (1 hour)
- Long-lasting relief (24 hours)
- Non-drowsy formulation

Precautions:

- Contraindicated in severe renal impairment and lactation
- Use with caution in pregnancy, hepatic impairment, and elderly patients
- Common side effects: dry mouth, fatigue, headache

Interactions:

- Avoid concurrent use with other antihistamines or sedatives
- Consult a healthcare professional before taking Levocetirizine, especially if taking other medications.

10) IONFLAM

Details: Ionflam the combination of Diclofenac (50mg), Paracetamol (325mg), and Serratiopeptidase (10mg) is a potent analgesic and anti-inflammatory formulation.

Description: The combination of Diclofenac (50mg), Paracetamol (325mg), and Serratiopeptidase (10mg) is a potent analgesic and anti-inflammatory formulation. It alleviates pain, inflammation, and fever in musculoskeletal, dental, and post-operative conditions. Diclofenac, a nonsteroidal anti-inflammatory drug (NSAID), reduces inflammation, while Paracetamol, an antipyretic, relieves fever and pain. Serratiopeptidase, a proteolytic enzyme, breaks down protein-based inflammatory mediators.

Common side effects include gastrointestinal issues, allergic reactions, and bleeding risks. Contraindications include hypersensitivity, severe gastrointestinal issues, or bleeding disorders. Dosage is typically one tablet thrice daily or as directed. Caution is advised in kidney/liver disease, pregnancy, and breastfeeding. This formulation provides effective relief but should be used under medical supervision to minimize adverse effects.

Prescription-only medicine; consult a doctor before use.

About Royal Sense Limited: Royal Sense Limited is a leading provider of innovative diagnostic solutions for healthcare professionals worldwide. With a focus on quality, reliability, and accessibility, we are dedicated to improving patient care and advancing the field of medical diagnostics.
